## Final report, fifth St. Louis Workshop on Wide Bandgap Nitrides

The fifth St. Louis Workshop in Wide Bandgap Nitrides was held August 4-7, 1998 in St. Louis, MO. The workshop was attended by some 80 researchers from mainly the United States and very topical and bottleneck type problems/issues were discussed. The workshop is unique in its approach in that short presentations on pertinent issues are followed by lengthy discussion. Following a group of somewhat related presentations, an overall discussion period involving the authors of that session and the audience is conducted. The forum provides a plenty of time for discussions of important and unresolved issues as opposed presenting polished and finished results typically presented in standard/conventional meeting. The participants over the years have been and are still supportive of the role the workshop plays for the community. It should be mentioned that this workshop carries the distinction of being the first ever meeting in the field in the world.

In 1992 the first-ever Nitride Workshop, and in October 1994 the second, in March 1996 the third, in October 1997 the fourth one, and in August 1998 the fifth one were convened with great successes, bringing together practitioners and theorists, and those who are in a position to have an impact. Much progress has been made toward realizing many of the concepts presented in the first and the second workshops. The response of participants to the first, second, third and fourth workshops was very enthusiastic, and many inquiries have been received since concerning the fifth workshop. A fifth such workshop held in an open forum will facilitate exchange of knowledge and information about recent developments in equipment, growth methods, growth issues particular to each method including lateral growth and associated spatial migration rates, new theoretical findings, dopant (both n and p type) incorporation and likely approaches to be employed, and potential applications to emitters, detectors and electronic devices. In particular the nitride community is at a turning point with respect to the best suited nitrogen source for vacuum deposition and surfactants to enhance migration rates. A workshop of this kind is ideal for bringing the experts in the field together for a hearty discussion of pivotal issues, such as defects, substrates, dopants, and other issues pertinent to devices for rapid progress to follow.

This report contains the announcement for the workshop, abstracts that have been submitted in addition to the solicited speakers, and the workshop program.

# FIFTH ST. LOUIS WORKSHOP ON WIDE BANDGAP NITRIDES ANNOUNCEMENT

Fifth Wide Bandgap Nitride Semiconductor Workshop  
Adams Mark Hotel, St. Louis MO USA  
August 4-7, 1998

The Fifth Workshop on Wide Bandgap Nitride Semiconductors will be held at the Adam's Mark Hotel near the famous St. Louis Gateway Arch by the Mississippi River in St. Louis, MO, on August 4-7, 1998. This date was previously selected and announced at the Fourth Workshop in March 1997. As you probably know, this is the location at which the previous four Workshops have been held.

The registration information, including the registration fee and the information on where to send the registration fee will be sent in the very near future.

Commencing with a reception on Tuesday evening, August 4, 1998 at 6:00 PM, the Workshop attendees will be treated to the famed Adam's Mark breakfast, lunch, and dinner, as well as coffee breaks on each of the three conference days, except that lunch will not be provided on Friday, August 7, due to the fact that no technical sessions will be scheduled for Friday afternoon.

In making hotel reservations, be certain to mention that you will be attending the Fifth Workshop on Wide-Bandgap Nitrides with local arrangements by Prof. Hadis Morkoç, Virginia Commonwealth University. The key words that will be used by the hotel reservation personnel are "Wide-Bandgap Nitride Workshop", so please fully identify the workshop by this name. Rates are \$115 and \$125 for single- and double-occupancy, respectively. The hotel can often be full during the time of this conference. Consequently, it is imperative that you make your reservation early. A limited number of rooms with government rates is also available, however, be certain to mention it at the time you make your hotel reservation. You must present your government ID at the time of registration to qualify for this rate. After July 3, 1998, the block of reserved rooms will be released for sale to the general public. For reservations call TEL: (314) 241-7400, FAX: (314) 241-6618. The Adam's Mark Hotel is located at Fourth and Chestnut Streets, St. Louis, MO 63102, approximately five minutes from Union Station, adjacent to the Gateway Arch.

St. Louis' Lambert International Airport can be easily accessed by air from most cities in the United States and many major cities throughout the world. The airport limousine costs about \$10 per person one way and \$15 round trip with pick up at Door 13 by the Baggage Claim Area.

We look forward to seeing you in St. Louis in August!

Russell D. Dupuis, Workshop Program Chair (dupuis@mail.utexas.edu, 512 471-0537).

Hadis Morkoç, Workshop Arrangements Chair (hmorkoc@vcu.edu, 804 828-0181).

Form Approved  
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. AGENCY USE ONLY (Leave blank)		2. REPORT DATE 12/10/98	3. REPORT TYPE AND DATES COVERED Final: 5/15/98-11/30/98	
4. TITLE AND SUBTITLE Organization of the Fifth Workshop on Wide Band-gap Nitrides			5. FUNDING NUMBERS N00014-98-1-0613	
6. AUTHOR(S) Hadis Morkoc				
7. PERFORMING ORGANIZATION NAMES(S) AND ADDRESS(ES) Virginia Commonwealth University School of Engineering PO Box 843068 Richmond, VA 23284-3068			8. PERFORMING ORGANIZATION REPORT NUMBER  1

a. DISTRIBUTION / AVAILABILITY STATEMENT  Approved for Public Release			12. DISTRIBUTION CODE	
13. ABSTRACT (Maximum 200 words) The fifth St. Louis Workshop in Wide Bandgap Nitrides was held August 4-7, 1998 in St. Louis, MO. The workshop was attended by some 80 researchers from mainly the United States and very topical and bottleneck type problems/issues were discussed. The workshop is unique in its approach in that short presentations on pertinent issues are followed by lengthy discussion. Following a group of somewhat related presentations, an overall discussion period involving the authors of that session and the audience is conducted. The forum provides a plenty of time for discussions of important and unresolved issues as opposed presenting polished and infished results typically presented in standard/conventional meeting. The participants over the years have been and are still supportive of the role the workshop plays for the community. It should be mentioned that this workshop carries the distinction of being the first ever meeting in the field in the world.
